BIOTA, Excelsa:

Valuable for its compact form, as well as being hardier than the other Biotas. In Oklahoma, Kansas, and other Middle Western States it stood the cold weather in fine shape, where Berckman's Bonita, and other Biotas were either damaged or killed outright. At Carlsbad, N. Mex., it stood 30 below zero without injury.

BIOTA, Springdale:

An old variety introduced by us several years ago. Very hardy, dark green and more slender than the Baker's Arbor Vitae. During the past seasons our plants were not injured by the extreme cold as were some of the less hardy varieties. An ideal plant for narrow places as it can be sheared very nicely.

CYPRESS, Italian Worthiana:

Very superior strain of symmetrical upright growth, and much hardier than other cypresses. The parent tree on our grounds is twenty years old and has never been injured by cold when all other specimens were either killed outright or severely damaged by the severe cold spells we have had every four or five years. Young plants propagated from this stock were uninjured in the field while other stock was killed. Every tree is handsome and uniform in its growth.

LONICERA, Goldflame (Copyrighted):
GOLDFLAME (Trade-marked):

"The best everblooming vine." In bloom constantly from early summer until killing frost. Showy tubular flowers with recurving petals, flame-red outside, bright yellow inside. **Delightfully fragrant, especially after night-fall.** Handsome blue-green foliage, almost evergreen. Extremely versatile; can be trimmed to make compact everblooming shrub or hedge; also useful as ground cover or for trellises, arbors, etc. Known to be hardy in all parts of the country.

LONICERA, Roseglo (Copyrighted):

ROSEGLO HONEYSUCKLE (Trade-marked):

Evergreen south, hardy north, and a free and abundant bloomer from late spring until severe winter. The flowers are two-lipped, tubular, deep rose-pink outside and creamy-white inside; exceedingly fragrant, borne in terminal clusters over the entire plant. The plant is erect and twining, forming a striking and desirable shrub if the long shoots are clipped back at intervals, though if allowed to grow freely will develop into a spreading, low-growing vine. The glossy gray-green foliage is very handsome.
